Subject: Subj: Microsoft settlement

To whom this email concerns;

I do believe that the settlement that has already been agreed upon between Microsoft and the US Government/States, I believe it to be fair for all parties concerned. Most of all this settlement is in the best interest of the American public and the country as a whole. I am in favor of the courts settling this case to allow our country to get on with the recovery that is so badly needed. I see no further litigation's needed. It is time that we as a country get this case behind us and to go on with the more important issues facing the nation and the economy.

Thank you so much for taking the time to read my comments dealing with the Microsoft lawsuit.

Mr. William MacKenzie
